-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

1. It is noted that Applicant elects Group I, claims 101, 102, 104-120 and 127-146, as stated in Applicant's response on 10 May 2007. Group II remains restricted for the reasons stated in the previous restriction.

2. Upon further review, the claims are noted to contain distinct species.

This application contains claims directed to the following patentably distinct species: obtained thicknesses are obtained by executing a simulation of the operation of the electroplating chamber based upon a mathematical model of the electroplating chamber and obtained thicknesses are obtained by measuring workpieces plated in the electroplating chamber. The species are distinct because they do not overlap in scope and there is nothing of record to show them to be obvious variants.

3. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 105 is generic.

4. This application contains claims directed to the following patentably distinct species: the method to produce additional sensitivity matrices for a variety of different conditions (of which distinct conditions are listed in claims 111-119). The species are distinct because they do not overlap in scope and there is nothing of record to show them to be obvious variants.

Art Unit: 1753

5. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 110 is generic.

6. This application contains claims directed to the following patentably distinct species: the second set of deposition control parameters is used to deposit material on the first workpiece and the second set of deposition parameters is used to deposit material on a second workpiece distinct from the first workpiece. The species are distinct because they do not overlap in scope and there is nothing of record to show them to be obvious variants.

7. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 130 is generic.

8. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

9. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
